

February 3rd, 2017,

To our Valued Customers:

This letter explains the **production-coding** scheme that is used on frozen foodservice juice products. Our products are coded with the date of production. This is accomplished with the Julian date followed by the last digit of the year. The Julian production code is placed on all primary packages. The shipping box includes additional information: flavor, manufacturing site, and time of production.

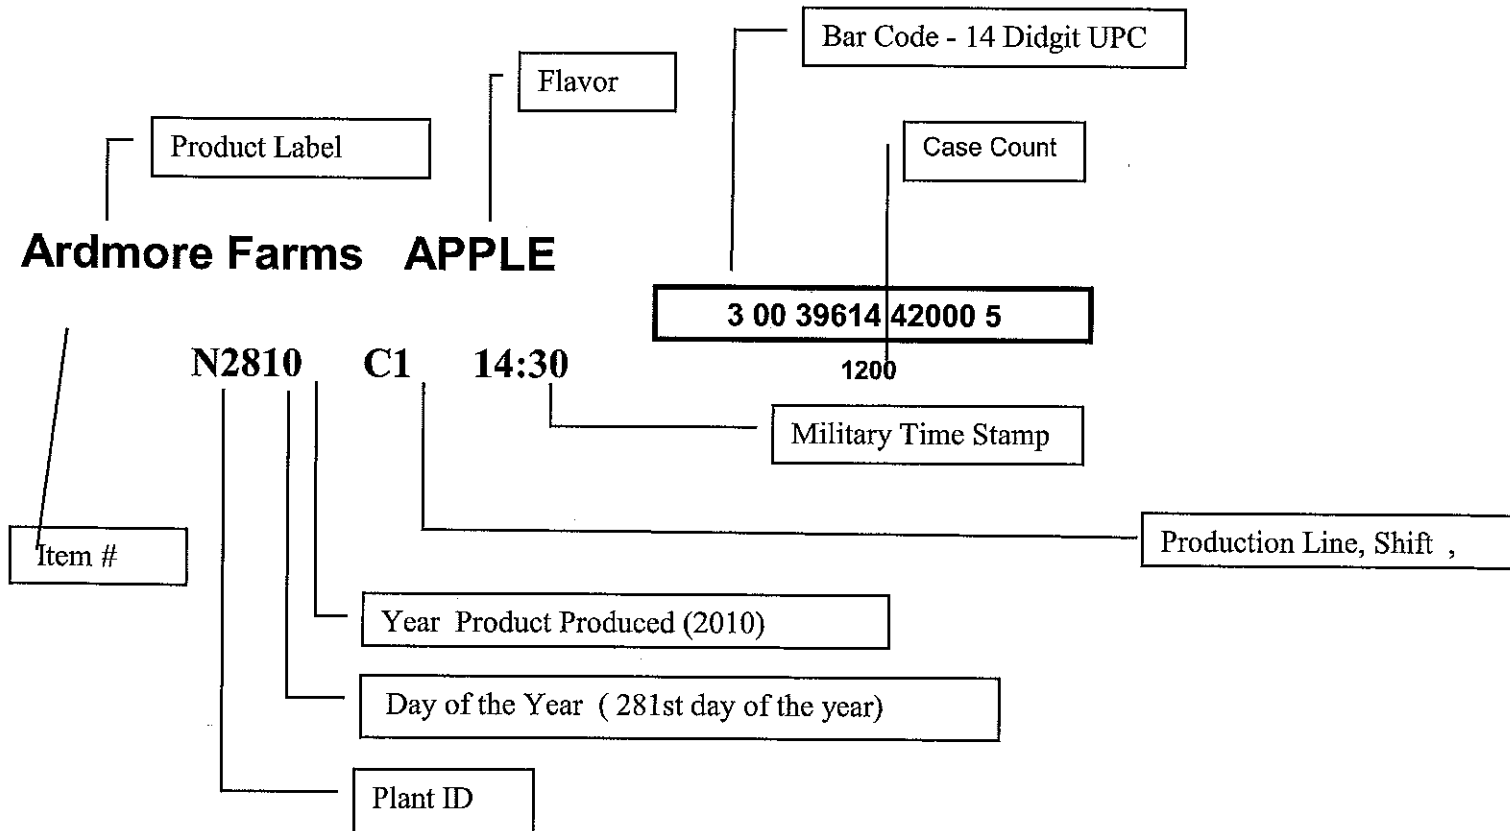

Example production code: **Apple D 2767 17:51**

1. **Apple** Juice
2. Plant designation
 - a) **D** = Deland, FL
 - b) **E** = Ellington, CT
 - c) **N** = Akron, OH
 - d) **H** = Houston, TX
3. **276** = Julian date, October 3rd
4. **7** = Year (last digit), 2017
5. **17:51** = Military time, 5:51 PM

Thank you for choosing the quality products of Country Pure Foods.

Example 4 oz Apple - Ardmore Farms

Explanation of Case Coding Format

Country Pure Foods
681 West Waterloo Rd.
Akron, OH 44314

To Our Valued Customers:

RE: Frozen Portion Fruit Juices produced by Country Pure Foods

Portion juices are single serve units ranging from 3 fl. oz. to 8 fl. oz in volume. Single serve portion juices have a shelf life of one year when stored frozen at 10°F or lower. Our juices should be thawed and stored under refrigeration (34°F to 38°F). For the best results, we recommend using all portion juices within 14 days from the initiation of thawing.

Thank you for choosing the quality products of Country Pure Foods.
