

Let's Celebrate Earth Day!

Draw a picture of yourself doing something kind for the earth. You use whatever materials you have around the house.

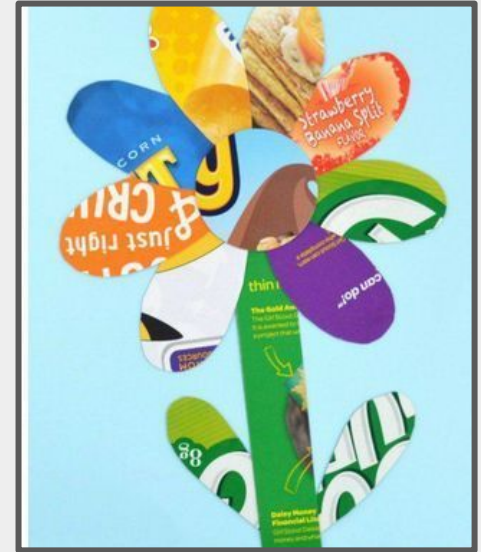

Using recycled materials to make COLLAGE

Use cut paper from magazines or leftover paper scraps to make a city.

Use leftover newspaper, printed paper and brown bags to create a fun animal image- or anything else your imagination can come up with..

Use cut paper from leftover grocery boxes to create a picture of anything you like.

Using recycled materials to make SCULPTURE

Use cut paper towel tubes to create 3D art by cutting them into different sizes and glueing them together.

Use bottle caps to make small sculptures like animals or bugs.

Using found objects around the house, create a sculpture by glueing the pieces together to make anything you like. If you don't glue the pieces together, you can make lots of different sculptures using the same materials over and over.
